Albums

We carry an exclusive line of elegant but affordable wedding albums. However as more and more couples are choosing to go with a virtual wedding album on DVD or CDROM as a starting point we can point you to suppliers that sell direct to public We can quote a package price and then you can order only when you are ready.

Virtual Wedding Album

All of our weddings include a FREE web page and album on our server. Its a great way to share your photos with distant family and freinds. Just one link to send in emails.

Archiving Digital Media

Storage of digital negatives and finished files is an issue as some types of digital media have a relatively short shelf life. CDROMs for example can deteriorate after only hree years. For that reason we provide multiple copies of all images and strongly recommend a "hard copy" media solution either usb flash media or an external hard drive to compliment the cdrom or dvd.
